

# BHARAT PARSIYA

bnap00@gmail.com • +91 9824359818 • Vadodara, India • [github.com/bnap00](https://github.com/bnap00)

## PROFESSIONAL SUMMARY

---

Senior Full Stack Engineer with 9+ years of end-to-end product delivery experience across fintech, logistics, IoT, and SaaS. Deep backend expertise in Node.js, AWS, and distributed systems — with a strong frontend foundation in React and Flutter. Proven ability to lead engineering from raw requirements to production scale, having managed junior developers and independently shipped multiple live SaaS products.

## NOTABLE ACHIEVEMENTS

---

- ✓ Independently built and launched RivalVantage, a competitive intelligence SaaS with paying customers on plans from \$9–\$199/mo.
- ✓ Built and scaled an IoT data ingestion system handling 200,000 device connections per minute.
- ✓ Launched StoreAuditor, an AI-powered SEO audit platform for Shopify merchants with agency-tier pricing up to \$299/mo.
- ✓ Led end-to-end delivery of 10+ client products across fintech, logistics, and startup domains as Tech Lead at Syntax Studio.
- ✓ Led development of Quantumloop AI's flagship embeddable chatbot product, deployable via a single line of code.

## SKILLS

---

**Backend:** Node.js, GraphQL, REST APIs, Express, Python

**Frontend:** React, Next.js, Flutter, React Native, TypeScript

**Cloud & Infra:** AWS (EC2, S3, Lambda, RDS), Docker, CI/CD

**Databases:** PostgreSQL, MongoDB, Firebase, Redis

**Tools:** Git, Puppeteer, Agile/Scrum, Google Ads Manager

## WORK EXPERIENCE

---

**Quantumloop AI** — London — Remote

**Senior Full Stack Developer**

*April 2025 – August 2025*

- Led development of the company's flagship embeddable chatbot product, deployable on any client website via a single line of code.
- Architected the backend integration layer enabling real-time AI responses and session management at scale.
- Standardized internal development processes and tooling, reducing release friction and improving cross-team delivery consistency.

**2K Games (via Mindera)** — Bangalore — Remote

**Senior Full Stack Developer**

*April 2024 – April 2025*

- Redesigned the developer documentation portal with improved navigation, accessibility, and usability, reducing onboarding friction for internal engineering teams.
- Designed and built a referral system flow within the internal tooling suite, reducing manual effort in managing referral programs.
- Built and optimized scalable frontend features using React and Next.js, focusing on performance and long-term maintainability.
- Partnered with engineering, product, and design teams across Europe to ship market-specific features on schedule, contributing to international platform expansion.

**Trainline (via Mindera)** — Bangalore — Remote

**Senior Full Stack Developer**

*May 2023 – April 2024*

- Developed monetization features for a high-traffic train ticketing platform, integrating Google Ads Manager while maintaining a non-intrusive user experience.
- Built and optimized ad integrations using Node.js, React, GraphQL, and AWS, directly contributing to revenue growth for the SaaS product.
- Led scalable platform changes to support market-specific features and international expansion across European markets.
- Integrated Google Native Ads, improving engagement metrics without degrading core user flows.

**GetFize.com** — Chicago, Illinois — Remote

**Senior Software Engineer**

*October 2022 – April 2023*

- Enhanced data scraping capabilities using Node.js and Puppeteer, enabling reliable extraction from HTML, PDFs, and dynamic pages.
- Built scalable AWS-based infrastructure to support high-volume data pipelines with optimal performance and reliability.
- Reduced system latency through parallel processing and caching strategies.

**Syntax Studio LLP** — Vadodara

**Full Stack Developer → Tech Lead**

*November 2017 – September 2022*

- Led end-to-end product delivery across 10+ client projects spanning fintech, logistics, and startup domains — from requirements gathering to production deployment.
- Built and scaled an IoT data ingestion system handling 200,000 device connections per minute, architecting the backend for real-time reliability and throughput.
- Managed and mentored a team of junior developers, conducting code reviews, setting technical standards, and driving delivery timelines.
- Designed and delivered full-stack applications across React, React Native, Flutter, and Node.js based on client requirements and platform needs.
- Automated client business workflows through custom web applications, reducing operational overhead.
- Maintained a modern, clean backend architecture for mobile bootstrapping used across multiple client projects.

**RTCamp** — Pune

**DevOps Engineer**

*January 2017 – August 2017*

- Maintained zero-downtime CI/CD pipelines across multiple projects, diagnosing and resolving build and release failures to keep development velocity high.
- Operated self-hosted WordPress infrastructure — handling backups, monitoring, and uptime — ensuring consistent reliability for enterprise clients.

## PROJECTS

---

**RivalVantage — Competitive Intelligence SaaS**

*2026*

[rivalvantage.com](https://rivalvantage.com)

- Independently built and launched a SaaS platform that monitors competitor websites, pricing pages, job boards, and social signals.
- Classifies changes into strategic signal types (pricing, hiring, messaging, launches) and delivers actionable daily briefs via email and Slack.
- Architected the full stack solo — frontend, backend, scraping infrastructure, and AI classification pipeline. Live with paying customers on plans from \$9–\$199/mo.

**StoreAuditor — Shopify SEO Audit Platform**

*2025*

[storeauditor.app](https://storeauditor.app)

- Independently built an AI-powered SEO audit platform for Shopify and WooCommerce merchants.
- Runs a 175-point dual scoring system across 14 metrics, with AI-generated product descriptions, FAQs, and SEO slugs. Supports multi-store management from a single dashboard.
- Built and launched solo; live product with agency-tier pricing up to \$299/mo.

**BreachKing Chess — Interactive YouTube Chess Stream**

*2024*

[chess.bnap.dev](https://chess.bnap.dev)

- Built a 24/7 live chess stream on YouTube where viewers submit moves via chat, with real-time move validation, a contributor leaderboard, and interactive music controls.
- Drove over 25,000 puzzles solved by viewers through chat, demonstrating real-time system reliability and sustained community engagement.

## EDUCATION

---

### **Dhirubhai Ambani Institute of Information and Communication Technology**

MSc in Information Technology

2017

### **Maharaja Sayajirao University of Baroda**

Bachelor of Computer Applications

2015
